O FFICE	3D DESIGNER	2008	> 100,000+ M2	INTERIOR	X-LARGE COMPLEX		CANCELED	HONORABLE MENTION
P UBLIC		2007						

The Goal of the project was to achieve a small common habitat as a teamwork with 12 other students. We proposed some shared spaces between the projects and connected them to each other.

We were looking to find a new style of habitation like Sociopolis project. Each project contained 10 houses and each house produced something to share with the others. So as a result, we have learnt more about the social life.

Isfahan, Iran, Student Project, 51,000 sqm
Art University of Isfahan
School of Architecture
2009

I proposed a big winery which has been run by 10 families. The forms in the design were so primitive, consisted of smooth underground units like caves and rabbit holes, but in terms of technology they were very up-to-date. I provided some dampers for ventilation and louvers and tents to control the sunlight and to save the energy.
