<b>P</b> UBLIC		2009						

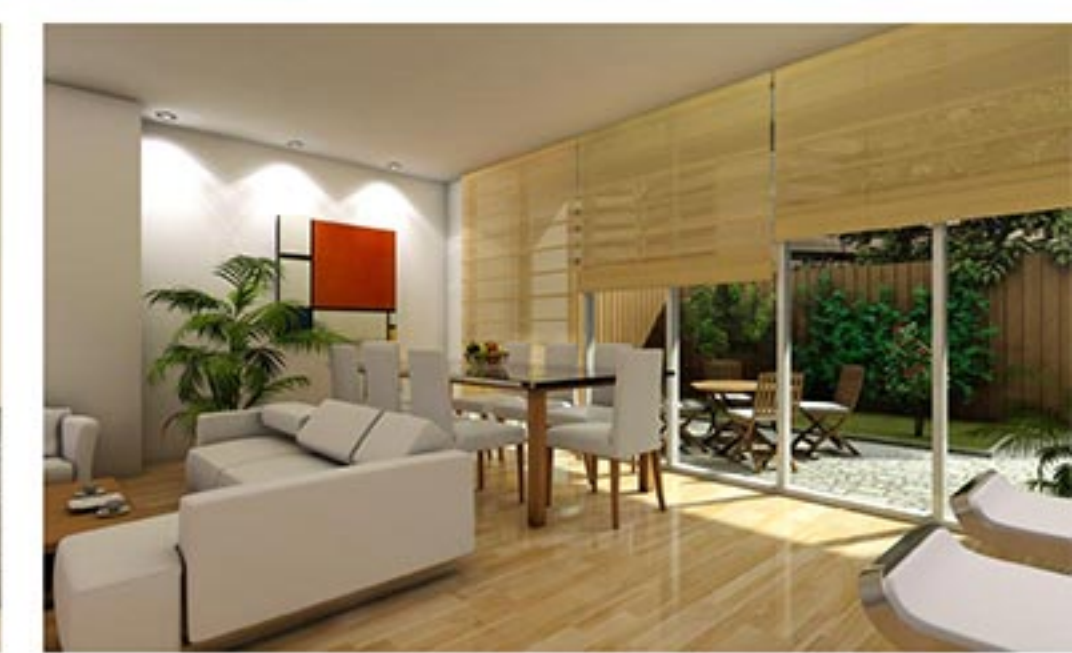

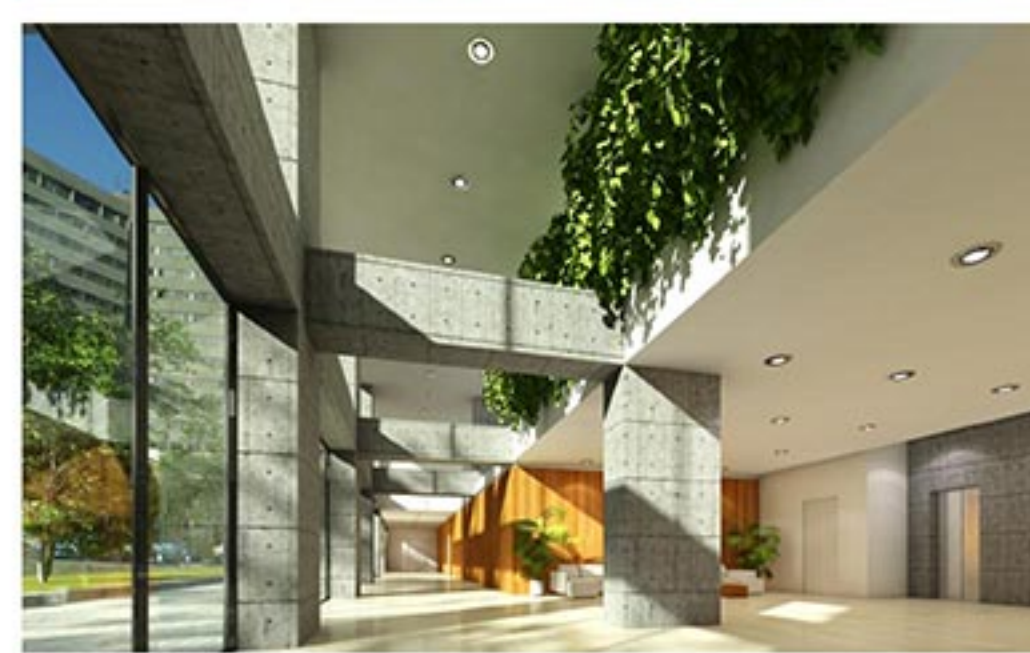

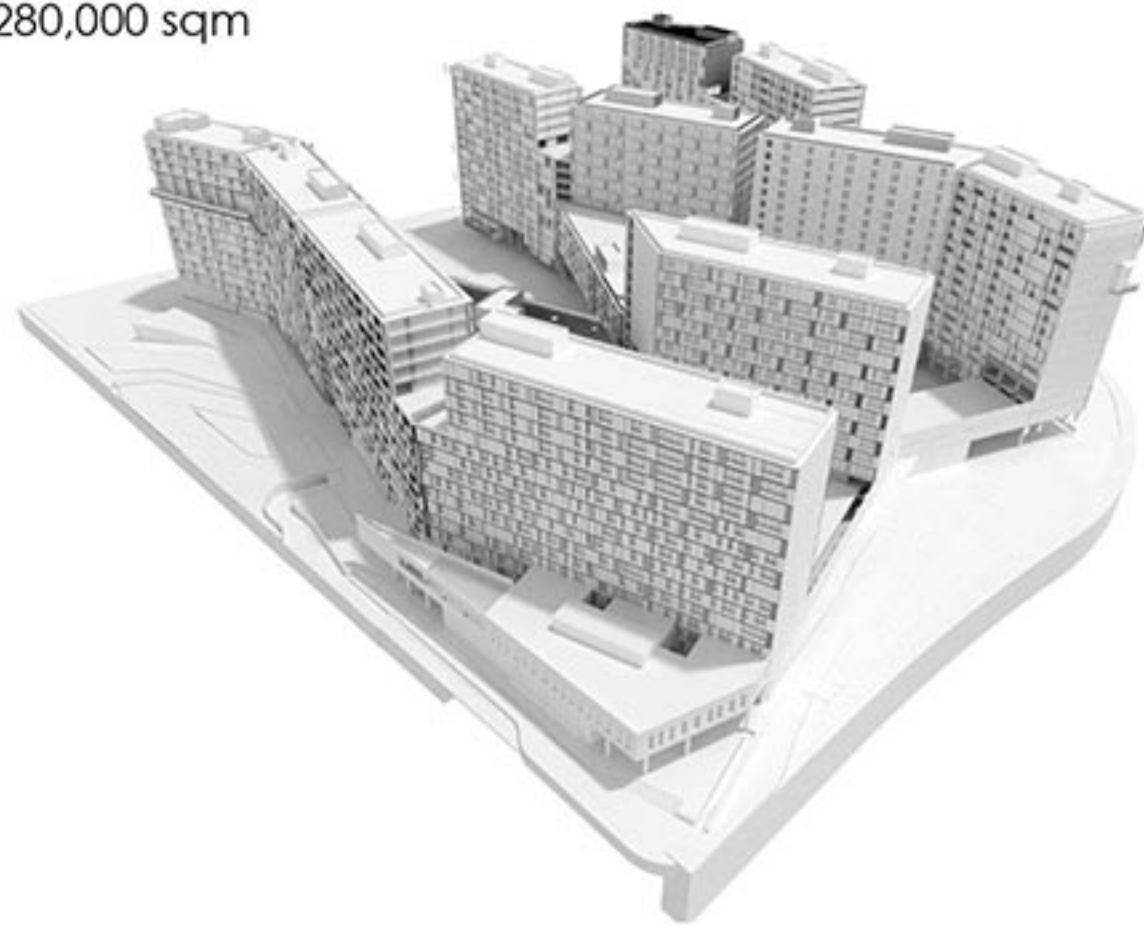

Ofoh Residential Complex is located in a 15.2 hectares' site in west of Tehran. The project is consisted of 1600 apartments, a local shopping center, and a primary school to serve its inhabitants.

The project designed in 11 blocks with 15 floors above the ground and 3 blocks with 4 floors above the ground. 23 different types of apartments with areas from 45 to 250 square meters were distributed in different blocks.

With %30 of footage, the blocks got attached to each other. Therefore, we proposed a dynamic double-façade for the residential floors which let the residents control the sunlight and view in their rooms.

Tehran, Iran, Professional Project, 280,000 sqm
