35° 42' 44" N - 51° 25' 31" E

Due to the development in the city of Tehran, Municipality decided to improve the visual quality of their buildings to encourage people to improve the urban view.

We decided to add a second layer to the main facade in order to decrease the distortion. The pattern was originated from a traditional pattern. These Perforated boxes have been rotated towards the sun in order to benefit the sunlight.

Tehran, Iran, Professional Project, 2,100 sqm
Collaboration with Boozhgan Studio
Competition
2014
