1ST PRIZE 2ND PRIZE 3RD PRIZE HONORABLE MENTION

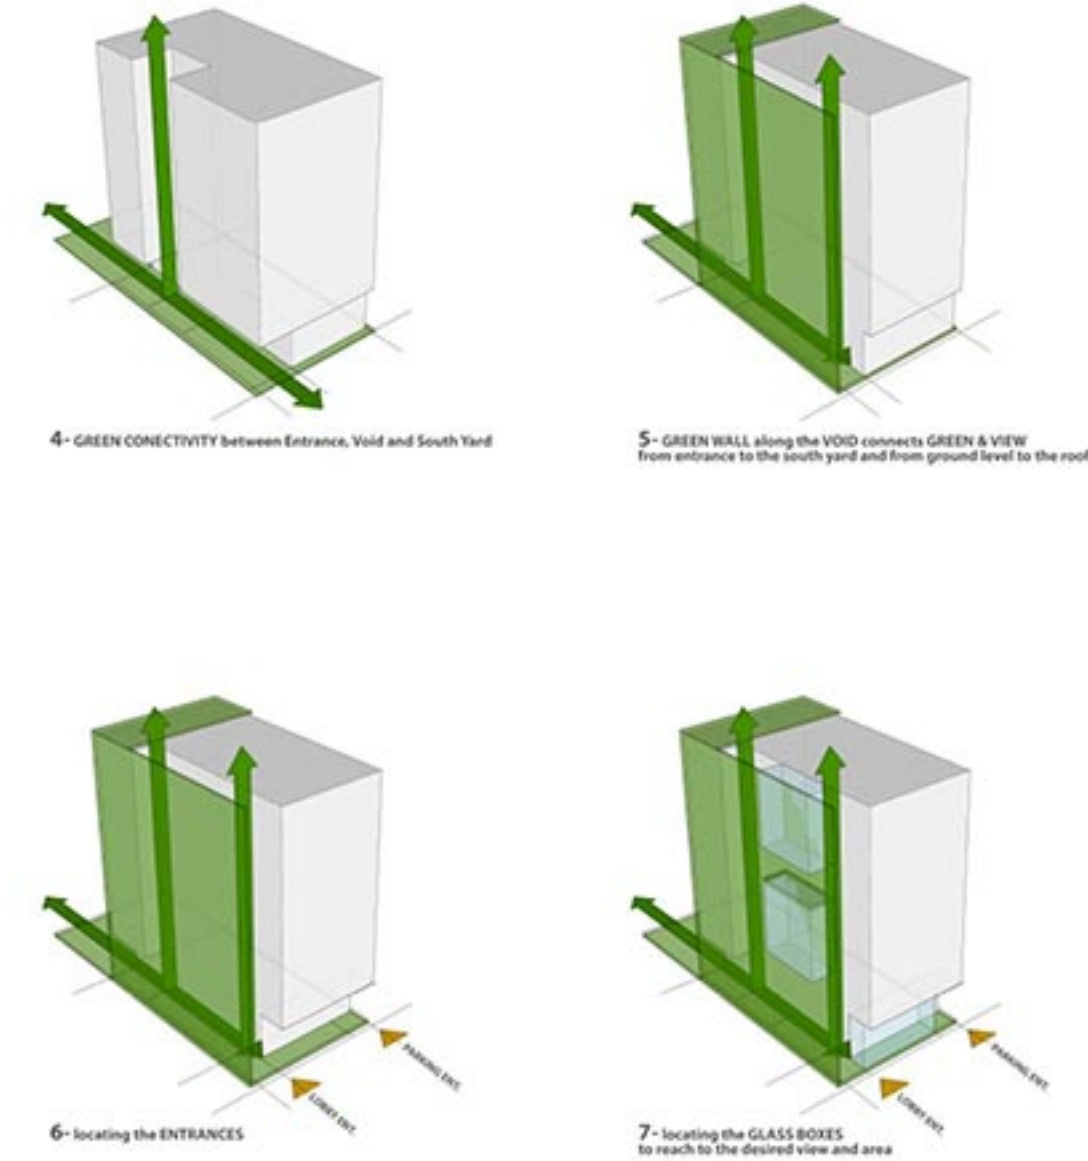

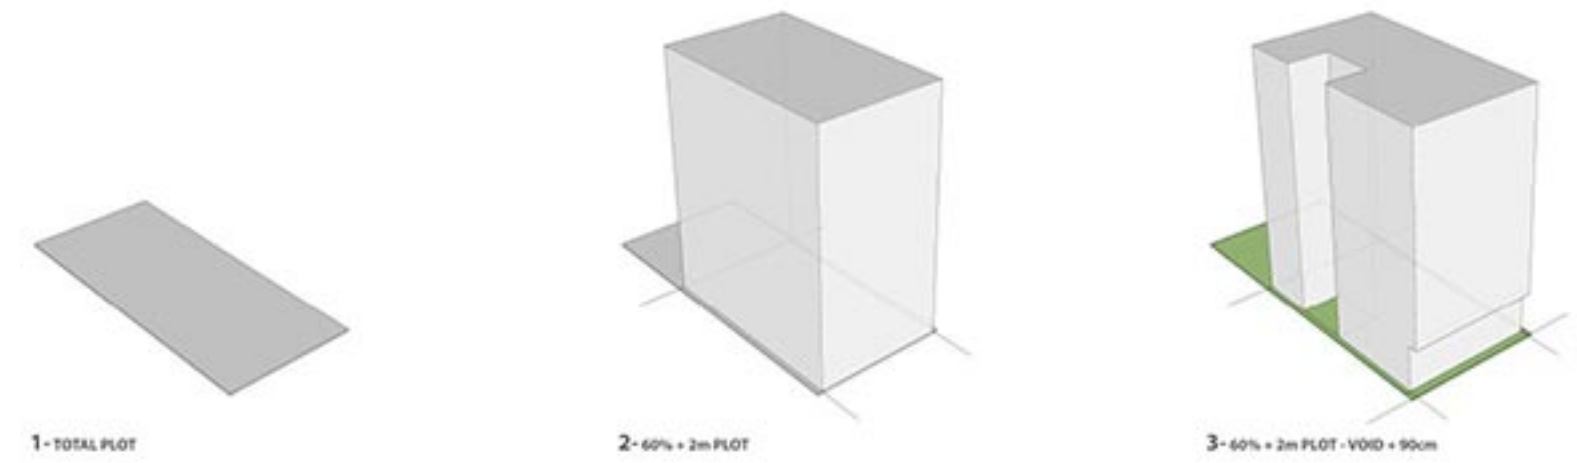

In Tehran; the city of chaotic buildings, architects must design very carefully. The facades must be calm, attractive and in harmony with the city.

So we proposed a flat and minimal facade, and a dynamic one to increase the energy level for the observant.

The Focal Point of the project is the Green Wall that is located at the entrance, and it moves through the building to make a visual connection between the inside and the outside.
